Noriaki Handa
Technical Product / Project Manager

Technical PM with a mobile engineering background (Flutter / iOS / Android). Leads requirements, execution, and AI-enabled delivery. Available from Apr 2026.

EDUCATION

B.Eng. in Electrical & Electronic Engineering

Hokkaido University (Information Electronics)

04/2019 - 03/2024

Courses

- Computer engineering fundamentals (e.g., Verilog HDL)
- Research: evaluation of actuator energy for artificial sense in myoelectric prosthetic hands

High School Diploma (English immersion)

William Fremd High School (Illinois, USA)

08/2015 - 05/2018

Courses

- Studied full-time in an English environment; strengthened academic writing and communication.
- AP-level coursework in Computer Science, Calculus, and Physics; National Honor Society.

WORK EXPERIENCE

Mobile App Engineer

teamLab Inc. ↗

08/2024 - Present

Ticket sales & video streaming app development

Achievements/Tasks

- Converted wireframes into specs and aligned stakeholders; delivered core features (incl. 3rd-party auth) in a large-scale project.
- Introduced decision templates and engineering guidelines (tech selection format, coding rules) to improve delivery quality and predictability.
- Embedded AI into the delivery loop (spec drafting, investigation, review checklists) to reduce rework and shorten feedback cycles.

Senior Technology Project Manager

Japan Advanced Communication Co., Ltd.

08/2023 - Present

Client-facing mobile app development (multiple projects)

Achievements/Tasks

- Owned end-to-end delivery for multiple client projects: requirements definition, prioritization, scheduling, progress tracking, and release coordination.

- Delivered Rakulip ↗ (on-device research video editor): managed roadmap and releases while contributing hands-on to an FFmpeg-based editing pipeline and quality/performance tuning.
- Since 09/2025, led discovery/prototyping and cross-team coordination for an external camera device integration app (confidential) on iOS/Android (Swift/Kotlin + Kotlin Multiplatform), including handover documentation.
- Standardized AI-assisted workflows for specs, estimation, and reviews to improve speed and consistency across projects.

Technical Project Lead (Flutter)

Hedgehog Medtech, Inc. ↗

08/2022 - 03/2024

Migraine & PMS medical treatment app development

Achievements/Tasks

- Coordinated requirements with PM/design/medical stakeholders and translated them into specs and milestones for two medical treatment apps.
- Led architecture/tech selection and established coding standards, CI/CD (CodeMagic), and release checklists.
- Maintained quality via code reviews and mentoring; delivered features with Riverpod/Freezed/i18n.

Technical Product Manager / Flutter Engineer

THE PHAGE Inc. ↗

11/2021 - 07/2022

Diabetes medical treatment app development

Achievements/Tasks

- Defined product direction and execution plan in an early-stage startup; aligned stakeholders and ran user discovery.
- Designed and shipped a Flutter app (Riverpod/i18n/local DB), including release management and internal rollout.
- Researched and prototyped signal-processing based prediction as a differentiating product feature.

CTO / Co-founder

Conomai, Inc.

02/2021 - 07/2021

New business creation for chronic kidney disease patients

Achievements/Tasks

- Led customer discovery (market research, interviews) and translated findings into product strategy and MVP scope.

- Built prototypes, defined operations, and aligned co-founders and external stakeholders on decisions and priorities.
- Supported fundraising and team building to move from concept to an execution-ready plan.

SKILLS

Product Management   Project Management

Requirements & Spec Writing

Stakeholder Management

Roadmapping / Prioritization   AI-enabled Delivery

Agile / Sprint Planning   Jira / Notion / Figma

Flutter / Dart   iOS / Android   Kotlin Multiplatform

Deep Links / OAuth/OIDC

CI/CD & Release Management   Testing / VRT

Git/GitHub

AI

- Use LLMs for PRDs/specs, user stories, acceptance criteria, and decision logs to keep teams aligned.
- Use AI for estimation/risk analysis, meeting summaries, and review checklists to reduce rework and keep projects on track.

PROJECTS

Prakasya *(07/2025 - Present)*

Product discovery & validation (React + Supabase)

- Defined target, messaging, and success metrics; built LP + waitlist + DB + analytics in 2 days and acquired 150 waitlist signups.
- Used Codex/LLMs to iterate copy, UX, and implementation quickly and validate hypotheses with real user data.

Notion Wordbook 🔗 *(02/2022 - 08/2022)*

Product delivery (Flutter + Notion API)

- Defined MVP scope and backlog, then shipped features with a small team.
- Established coding rules, reviewed code, and mentored junior members via pair programming.

Study Matching 🔗 *(06/2019 - 09/2020)*

Product launch & community growth (Flutter + Django REST)

- Launched and operated the app from zero to release; reached 20% student registration at the university through continuous user feedback.
- Coordinated a small team while maintaining backend infra (Django REST + PostgreSQL + Docker).
